SKILLS

CS: JavaScript, Ruby, Rails, React.js, Redux.js, Node.js, Express.js, NoSQL (MongoDB), PostgreSQL, CSS, HTML

PROJECTS

CryptoList | [Live Demo](#) | [GitHub](#) Mar. 2020

Full Stack Web Application (Ruby on Rails, PostgreSQL, React.js, Redux.js)

- Solely developed an AngelList clone over a 14-day timeframe, following CRUD and RESTful API principles in designing a reactive, single-page website that allows users to create profiles, companies, and post and apply to jobs
- Utilized JBuilder and jQuery to facilitate communication between the frontend and backend of the application and axios to manage external HTTP requests, in addition to employing webpack to bundle modules and manage API keys
- Integrated the CoinMarketCap API to extract real-time cryptocurrency listings and pricing data for job postings that refresh every time a user navigates to an applicable page, as well as AWS S3 for profile picture storage

HikeSF | [Live Demo](#) | [GitHub](#) Mar. 2020

Full Stack Web Application (MongoDB, Express.js, React.js, Redux.js, Node.js)

- Served as Project Manager for a 4-person team developing a crowdsourced hiking website, managing Git workflow and leading system design and debugging efforts while overseeing completion within a 6-day timeframe
- Drove backend development, generating customized database schema, validations, and handling of HTTP requests, while employing Mongoose to interface with MongoDB and multer middleware to store images in AWS S3
- Personally implemented the Google Maps JavaScript and Directions APIs to enable users to produce and view customized hiking trails, as well as the Dark Sky API to fetch live weather data upon trail show page refresh

Talkie | [Live Demo](#) | [GitHub](#) Mar. 2020

Frontend JavaScript Application (Vanilla JavaScript, Canvas, Web Audio API)

- Solely developed an audio visualizer that allows users to upload, play and visualize audio tracks entirely within the client-side, using minimal code and no imported libraries
- Designed a light, easy-to-use UI that employs icon affordances to facilitate user interaction with little instruction

PROFESSIONAL EXPERIENCE

Houlihan Lokey | San Francisco, CA Jul. 2018 – Aug. 2019

Technology Investment Banking Analyst

- Performed in-depth financial modeling and conducted extensive financial and business due diligence to support private placements and acquisitions for sell side clients in the SaaS space
- Collaborated closely with c-suite management and senior Houlihan Lokey officers to develop and implement effective positioning strategy and ensure meticulous execution of transaction process
- Spearheaded research and business development coverage of legal, nonprofit, and travel & hospitality SaaS domains by developing thesis-driven marketing materials and leading targeted outreach initiatives

Select Transaction Experience:

- Project Falcon – Sell side M&A of an OTA
- Project Lark – Private placement in a mPOS company
- Project Peregrine – Private placement in an HCIT company
- Project Apollo – Sell side M&A of a DRaaS company

EDUCATION

App Academy | San Francisco, CA Dec. 2019 – Apr. 2020

Full Stack Web Development Bootcamp

University of California, Berkeley | Berkeley, CA Aug. 2014 – Dec. 2017

B.S. Business Administration

SAT: Cumulative 2240 | Math 720 | Writing 730 | Reading 790

Haas Business Major GPA: 3.82
